

Pioneer in Night Transport

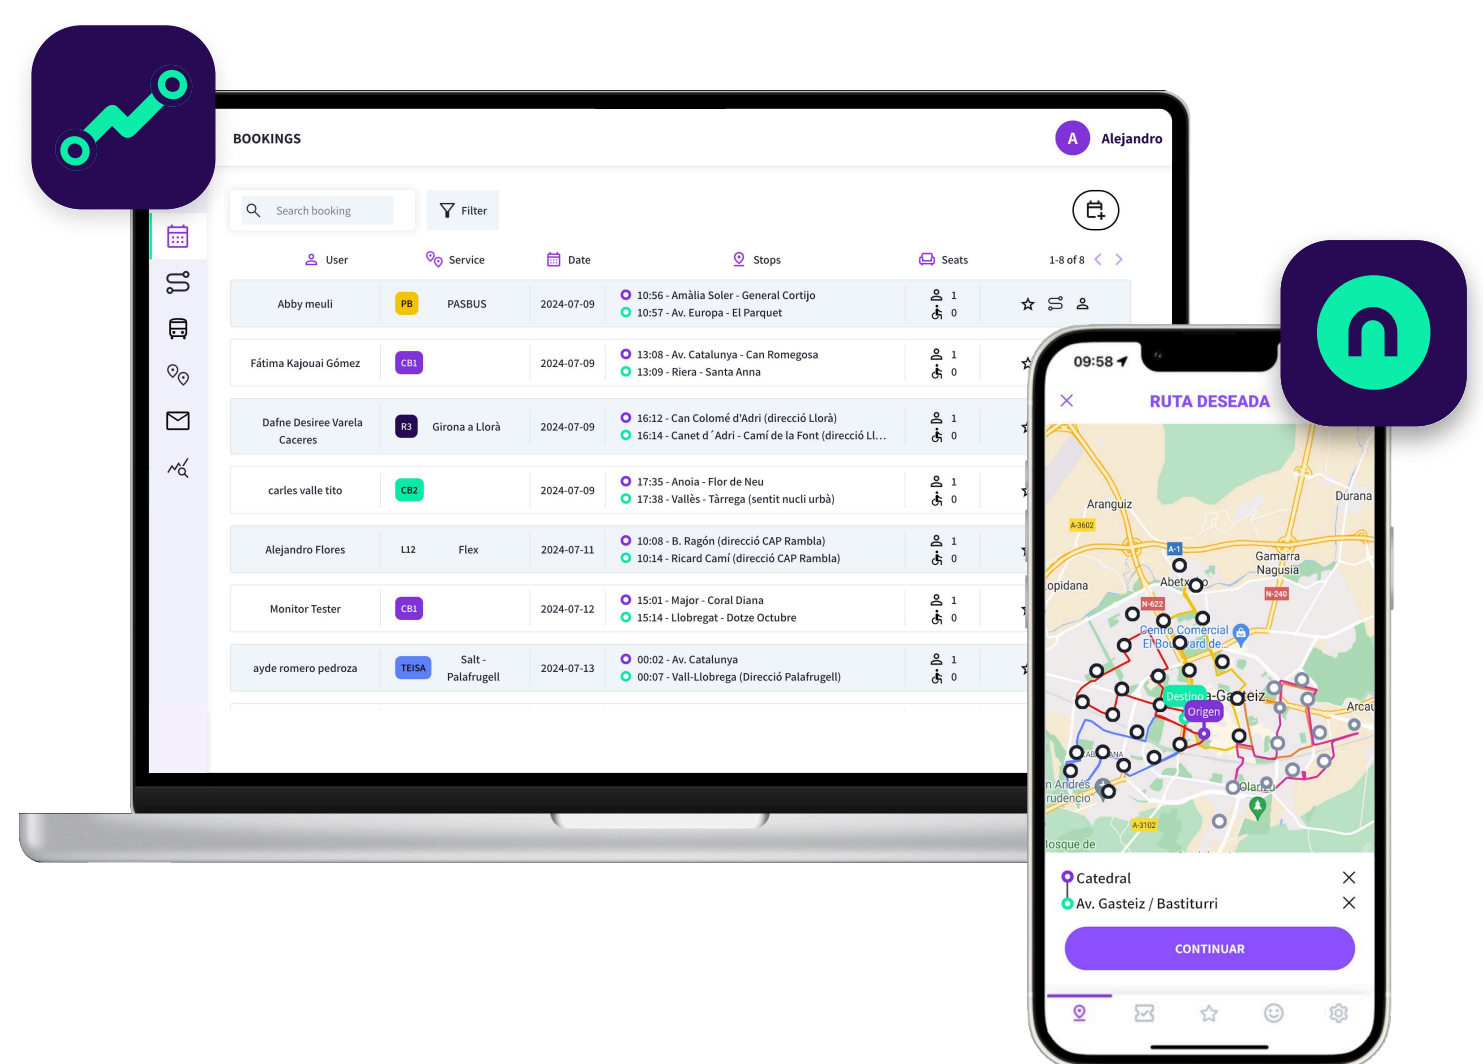

Capital of the Basque Country, Vitoria-Gasteiz has a compact bustling city center with residential areas that radiate out from the old town. With over 250.000 inhabitants and having been the green European capital, Vitoria-Gasteiz defines itself as “a compact, pedestrian scale city until recent growth and latest urban developments”.

“ The digitalisation of the on-demand extensions to Vitoria’s night bus lines that radiate from the city center has been a huge success. Our users have real time location of the bus avoiding long waits on the bus stop late at night, a pre-bookable service and increased density of bus stops which reduces the walking time and distance home. Another step towards transparent, safe and accessible public transport!

About The service

Nemi’s on-demand night bus service connects the city centre with outlying residential areas. The service ensures the safety for vulnerable passengers, defined as women and passengers under 18, on the service that runs Friday, Saturday and pre-public holiday evenings from 11 pm to 6 am. The on-demand extension is marked as a dotted line in the map.
